

# HVAC Retail Solutions

## Retail HVAC specialists

Our customers have found that working with GK Industrial has given them added value and greater operational advantages to their store air conditioning and heating systems that they would not receive from large Facility Management or multi-discipline service providers.

With energy efficient and cost saving solutions at the heart of our service offering, GK offer a consultative approach to retailers Heating, Ventilation and Air Conditioning requirements.

## Proven Retail Experience

GK works with many famous high street retailers including Next, Wilkinson's and Brighthouse; giving comprehensive service and maintenance coverage across the UK and Eire.

We have an inclusive specialist network of skilled dedicated engineers that cover over 1000 individual customer sites across the UK. Therefore clients can be sure that we will have coverage over every location in the UK, and can comfortably reach their store within set KPI's and agreed compliance targets.

## Cost Savings

GK has a variety of cost saving installations, service packages and solutions that can add real value to a retailers' bottom line. By making an in depth assessment of our clients estate, and working in partnership to understand their needs; we have introduced technology led solutions tailored to the customer.

As part of this ongoing relationship with our customers, we have implemented the largest ever UK roll out of retrofitting over 148 retail stores with our free cooling concept. This has been proven to deliver almost an 80% reduction in compressor operating hours for the customers' air conditioning systems, equalling to annual savings of over £9000 for the air conditioning running costs of a 23,000 sq ft retail store for example.

## Service and Maintenance

The services installed in modern buildings encompass a variety of different technologies, and with the correct attention will reward customers with many years of trouble free service.

If this upkeep is neglected, the equipment can quickly depreciate from an asset to a liability; causing excessive replacement parts to be fitted, unnecessary call out charges and expensive new systems.

At GK Industrial we are able to tailor a service schedule to suit customers' needs and budget, from a basic six month visit to a more intensive on site involvement, favoured by some of our larger clients.

A selection of the schedules used by our customers for example include:

- Filter change and grill clean contracts.
- Parts only short term contracts.
- Full all inclusive cover.
- Selected rolling contracts.

## About GK Industrial

As a specialist installation and maintenance provider of environment managed solutions, GK Industrial Ltd aims to manage climate control and energy efficiency issues on behalf of its many national clients in the retail, food, commercial, industrial and public sectors.

The company's portfolio covers the entire spectrum of installing complete air conditioning, heating, ventilation, refrigeration and energy efficient lighting systems, to providing service maintenance contracts for both GK installed and client adopted systems.
